This being the first of the NZ trips we plan on running it is at a special price rewarding those that want to jump in, it's planned to be a relaxed trip staying in great accommodation and not having to drive yourself, airport transfers are included and we can be somewhat flexible with those.

The diving is fantastic and we plan to dive 2-3 different areas, with the flexibility of having a trailerable RIB we can pick up and move to where the weather and conditions are good, we have a day of exploration diving in the itinerary and this will be a group decision (and weather of course) You will be looked after rather well but you will be expected to chip in and help out with things from time to time.

Any other questions you have just have a chat to Karl and if you have any specific requirements also just run it past the Kiwi :)
